1 Inc. will provide a quarterly report to
2 the FDA compiled from all data collected
3 by the methods described under the Actiq
4 surveillance and monitoring program
5 interventions, see Sections 8.0 and 9.0
6 of the document. This report will
7 describe and provide data and any
8 concerns for child safety, diversion and
9 off-label usage.

10 So that was -- that's the
11 report that you were required to prepare,
12 right?

13 A. That's correct.

14 Q. So one of those components
15 was to provide data and concerns about
16 off-label usage to the FDA, because they
17 wanted to know what was happening, right?

18 A. Yes.

19 MR. CRAWFORD: Can we go off
20 the record for a little bit? I
21 think we might have a quarterly
22 report, and this might be a good
23 time to get that.

24 VIDEO TECHNICIAN: Going off

1 the record. 11:22 a.m.

2 - - -

3 (Whereupon, a brief recess
4 was taken.)

5 - - -

6 VIDEO TECHNICIAN: We're
7 back on the record at 11:34 a.m.

8 - - -

9 (Whereupon, Teva-Marchione
10 Exhibit-9,
11 TEVA_MDL_A_04578988-9017, was
12 marked for identification.)

13 - - -

14 BY MR. CRAWFORD:

15 Q. Ms. Marchione, we did find a
16 quarterly report, I believe, Exhibit-9,
17 dated September 24th, 2003 signed by you.
18 It's TEVA_MDL_A_04578988.

19 Is this a quarterly report
20 that you referred to earlier?

21 A. Yes, it is.

22 Q. And this was prepared or
23 compiled by you or your department,
24 right?

1 A. That's correct.

2 Q. And submitted to the FDA,
3 correct?

4 A. That's correct.

5 Q. And if you could, maybe take
6 a few moments to look at it, maybe go to
7 the first page, which is at 93.

8 It says, Actiq risk
9 management program, 17th quarterly
10 report, April 1st, 2003 to June 30th,
11 2003.

12 This was the report that was
13 referenced in, I think, Section 10 of the
14 RiskMAP document, right?

15 A. That's correct.

16 Q. And this is a report that
17 you would prepare in your ordinary course
18 of business, right?

19 A. That's correct.

20 Q. And this one, in fact, was
21 submitted to the FDA?

22 A. That's correct.

23 Q. And I think the first page
24 here, Page 2, actually, it says, Actiq

1 surveillance and monitoring programs,
2 Sections 8 and 9, surveillance goals and
3 activities.

4 And then it starts with
5 direct patient feedback and continues
6 through with sections that correspond to
7 the actual RiskMAP sections, right?

8 A. That's correct.

9 Q. So I think my question
10 was -- that you wanted to refer to it --
11 I think it was dealing with the 15
12 percent requirement in the Actiq RiskMAP,
13 right?

14 A. That's my recollection.

15 Q. Yeah. I think that was --
16 just so you can pull it up next to it,
17 that was Exhibit-7, Page 27, groups of
18 prescribers, under off-label usage.

19 And I think I had asked you
20 exactly how -- how the company
21 interpreted and implemented this
22 mechanism to evaluate the prescribing by
23 these groups of physicians.

24 Is there anything -- and

1 take your time, but is there anything in
2 the quarterly report that triggers your
3 recollection of how the company might
4 have interpreted and utilized and
5 implemented that mechanism?

6 MR. DIAMANTATOS: Objection
7 to form.

8 THE WITNESS: Just give me a
9 minute, please.

10 BY MR. CRAWFORD:

11 Q. Take your time.

12 This one, actually, I think,
13 at Page 11 and 12, seems to skip over the
14 9.1.2 section.

15 A. That's what I'm looking at.

16 Because we did -- oh, God.
17 We did always have the 15 percent cutoff.
18 There was an IMS printout that listed --
19 did we -- wait a second.

20 So in Section 8.2.1 on Page
21 3, under, NDC Source Prescriber audit, it
22 states there, The data from the NDC
23 Source Prescriber audit shows that none
24 of the nontargeted physician specialties

1 exceeded 15 percent of the total
2 prescriptions during 2Q03.

3 So the actual documentation,
4 if I remember correctly, you know, was
5 very long and -- but we would get the
6 information and review it and put that
7 statement.

8 So it's on Page 3, under
9 8.2.1.

10 Q. Right. Okay. So the
11 corresponding section in the Actiq
12 RiskMAP is on Page 23, under 8.2.1, IMS
13 Xponent. That shows a different data
14 source, NDC Source Prescriber audit.

15 Is that the reason why
16 that's different than what's required by
17 the RiskMAP?

18 A. This is one of those
19 evolving operational things. And maybe
20 the IMS Xponent wasn't available any
21 longer. So I think they switched over to
22 an NDC component.

23 Q. Do you know if the FDA ever
24 approved that switch?

1 MR. DIAMANTATOS: Object to
2 form.

3 Go ahead.

4 THE WITNESS: I doubt it.
5 Again, we informed them every time
6 we changed something. But, as I
7 mentioned earlier, they -- we
8 never got, you know, an
9 acknowledgment letter.

10 We definitely sent it in
11 writing that -- what we were
12 changing along the way.

13 BY MR. CRAWFORD:

14 Q. Right. But there's nothing
15 in 8.2.1 that talks about the 15
16 percent --

17 A. So I think --

18 Q. -- specialties. That comes
19 under -- if you look under the RiskMAP on
20 Page 27, that 15 percent is under 9.1.2.

21 And you'll agree with me
22 that that section is omitted, 9.1.2, from
23 the report, right?

24 A. I agree. And it's one of

1 those historical -- if you looked back in
2 the communication logs, we probably
3 communicated that we were now
4 combining -- using the IMS for the
5 Xponent.

6 And that's why we say here
7 explicitly that the nontargeted physician
8 specialties exceeded 15 percent of the
9 total prescriptions.

10 And it's one of those things
11 that you have to go back historically and
12 look at all the FDA correspondence to
13 figure out when that changed and why, and
14 we explain that.

15 Q. But, I mean, it would have
16 been just as easy to put it under 9.1.2
17 on Page 12, right after 9.1.1, talking
18 about individual prescribers.

19 I mean, is there a reason
20 why you couldn't have put it under that
21 section, which is the logical section,
22 because that's where 15 percent is
23 discussed, in that section?

24 A. Right. And I believe -- I

1 can't remember exactly, but because they
2 were both kind of looking at the same
3 thing, I think we combined it into that.

4 So we could repeat it again,
5 but -- if you looked at the progression
6 of the reports and the communication, it
7 would probably make a lot of sense where
8 things were. We told them we were moving
9 things or what we were doing.

10 So we were probably using
11 the same source now to answer both
12 things. So this came up first, and
13 that's why we put it there.

14 Q. So was there ever any point
15 in time that you, in one of these
16 reports, reported that there were
17 nontargeted physician specialties that
18 did exceed 15 percent of total
19 prescriptions?

20 MR. DIAMANTATOS: Objection.
21 Form. Vague as to time.

22 BY MR. CRAWFORD:

23 Q. At any time.

24 A. I think there was one --

1 MR. DIAMANTATOS: Same
2 objection.

3 THE WITNESS: -- quarter, or
4 two. It was later in the -- it
5 was later, you know, towards the
6 end of the marketing or the sales.

7 So I don't know -- I can't
8 exactly -- but we only exceeded it
9 once or twice. That why I wanted
10 you to actually see this, because
11 we never -- I think we
12 initially -- we can find the
13 date -- we never exceeded it
14 except for once or twice.

15 BY MR. CRAWFORD:

16 Q. All right. And then do you
17 remember what nontargeted specialties
18 exceeded 15 percent in those reports?

19 A. I don't remember.

20 Q. All right. And what is a
21 nontargeted physician specialty?

22 A. I believe -- I believe
23 somewhere down the line we communicated
24 to the agency who -- the groups that

1 they -- I don't know who, I guess,
2 commercial, identified were not
3 prescribing for oncology.

4 So it could go beyond
5 oncologists. And so whatever groups that
6 they identified, there's a communication
7 somewhere and why they chose those
8 groups.

9 Q. All right. So just turn to
10 Page 27 of Exhibit-7.

11 I'm trying to understand
12 about the -- this is 9.1.2.

13 A. 27 --

14 Q. That would be exhibit, I'm
15 sorry, Exhibit-7, which is the Actiq
16 RiskMAP.

17 A. I'm sorry, what page?

18 Q. I think you might be in the
19 quarterly report.

20 A. You want 27, sorry.

21 Q. Yes.

22 A. Okay.

23 Q. And I'm just trying to
24 understand what you're reporting here.

1 So what the FDA -- or what
2 the RiskMAP says is, If groups of
3 physicians (such as a particular
4 specialty) are identified as having
5 prescribed Actiq inappropriately and
6 these prescriptions represent potential
7 off-label usage greater than 15 percent
8 of total quarterly Actiq prescriptions,
9 Cephalon will contact the appropriate
10 professional society.

11 A. Right.

12 Q. It gives examples, American
13 College of Surgeons, American Society of
14 Anesthesiologists.

15 And then you say in your
16 report to the FDA, under 8.2.1, Data from
17 the NDC Source Prescriber audit show that
18 none of the nontargeted physician
19 specialties exceeded 15 percent of the
20 total prescriptions during Q203.

21 So the nontargeted physician
22 specialties are specialties that are
23 not -- would not be prescribing the drug
24 as it was indicated, right?
